

ATP

Description: Adenosine 5'-triphosphate (ATP) can be applied to in vitro transcription, RNA amplification, siRNA synthesis, ligation and phosphorylation.

Molecular Formula: C₁₀H₁₆N₅O₁₃P₃ (Free acid)

Molecular Weight: 507.18 (Free acid)

CAS No.: 56-65-5 (Free acid)

Concentration: 100 mM

Specifications: 1 mL

Purity: HPLC ≥99%

Salt type: Na⁺

Structure:

Storage Conditions: store at -20°C.
